### **altumAI joins Ericsson Industry 4.0 partner program for Independent Software Vendor**

**Chicago, IL – October 12, 2021**– altumAI announced today that it has executed the required agreement to participate in Ericsson Industry 4.0 partner program, delivering value by its apps and software that transforms worker health and safety with data and AI.

“Ericsson’s Industry 4.0 Partner Program aligns us with global leaders in manufacturing, distribution, and logistics who are focused on making workplace safety a top priority by using the power of data, AI and mobile enabled technology,” said Lars Skari, Co-Founder and Chief Client and Product Officer, altumAI. “We are thrilled to work with Ericsson on implementing the altumAI platform, including our SAM (“Safety about me”) digital safety coach. Sam leverages the phone as a worker telematics device to understand musculoskeletal injury risk and uses environmental and worker provided insights to create awareness, engagement, and action. Built to accommodate an ever-increasing number of workplaces IoT data sources, altumAI’s platform will help Ericsson’s customer base reduce injuries and claims and support an engaged and informed safety culture.”

The Ericsson Industry 4.0 Partner Program is a vehicle for solution providers who offer their technologies as a part of Industry 4.0 ecosystem. This program sets the standard for recognizing a partner’s investment in the tools and processes necessary to provide high return on investment for industrial customers using cellular connectivity as the foundation for their Industry 4.0 initiatives.

Purpose-built for industrial environments, Ericsson Industry Connect is a dedicated wireless cellular network that provides secure, reliable coverage, high device density, and predictable latency. Leveraging this connectivity solution, enterprises can gain full visibility of machines, processes, and data, using 4G/LTE now with a clear path to 5G.

Ericsson Private Networks provide high reliability, high performance, and secure communications, fulfilling business critical and mission critical needs. The solutions enable integration of diverse devices across a wide range of applications for industry enterprises.

*“Ericsson is working with companies like altumAI to nurture the ecosystem and ensure seamless and secure Industry 4.0 deployments,” said Thomas Noren, Head of Dedicated Networks at Ericsson. “We are pleased to see the growth of technologies that focus on the connectivity that underpins digitalization for Industry 4.0.”*

## About altumAI

altumAI's platform and mobile apps use data and AI to transform how organizations manage safety and prevent injuries. Leveraging multiple data sources and a sophisticated platform that delivers the right information to the right worker at the right time via Sam ("Safety about me"), the safety bot, altumAI helps organizations reduce the cost and frequency of injuries, ensure compliance, and boost productivity, all while engaging and enabling the workforce. Sam's AI learns about every worker to understand their unique risks to deliver safety content, training, operating procedures, and compliance to each individual worker. altumAI supports clients of all sizes across a variety of industries.
