

**futureWork Insurance Solutions partners with Service Lloyds for tech-enabled MGA to reduce workplace injuries and lower the cost of Workers' Compensation Insurance.**

Los Angeles – January 4, 2022– futureWork Insurance Solutions (futureWork), a tech enabled MGA reimagining Workers' Comp insurance announced today a new partnership with Service Lloyds Insurance Company (Service Lloyds). Service Lloyds is a nationwide, privately held workers' compensation insurer that has been offering insurance solutions for over thirty years.

The futureWork MGA is leading the way towards a more compelling and comprehensive workers compensation solution by integrating altumAI's cutting edge software that predicts individual worker risk, provides mobile enabled incident reporting, and delivers digital coaching and training materials. altumAI's software combined with Tangram Insurance Services' (Tangram Insurance) niche-based underwriting, rewards overall improved safety with lower workers compensation rates.

"We are thrilled to partner with Service Lloyds; an AM Best "A" rated insurer who recognizes that a technology enabled solution to create a safer work environment in real time can play a vital role in the efficiency and profitability of organizations" said Rekha Skantharaja, of futureWork Insurance Solutions. "Together we are dedicated to improving policyholders' safety program(s), reducing workplace injuries, and lowering Workers' Compensation costs through our tech-enabled MGA."

"Service Lloyds is excited to build on our relationship with Tangram and futureWork" said Jacob Clymer, Chief Operating Officer. "Our value-based dedication to employer safety and futureWork's cutting edge technology provides an enhanced solution to employers and the industry".

futureWork's initial focus is the agricultural sector and they are working closely with select broker partners to provide exclusive access to their competitive insurance and safety technology. To find out how your brokerage can join futureWork; apply to be appointed by visiting:
